Dispatching Flights

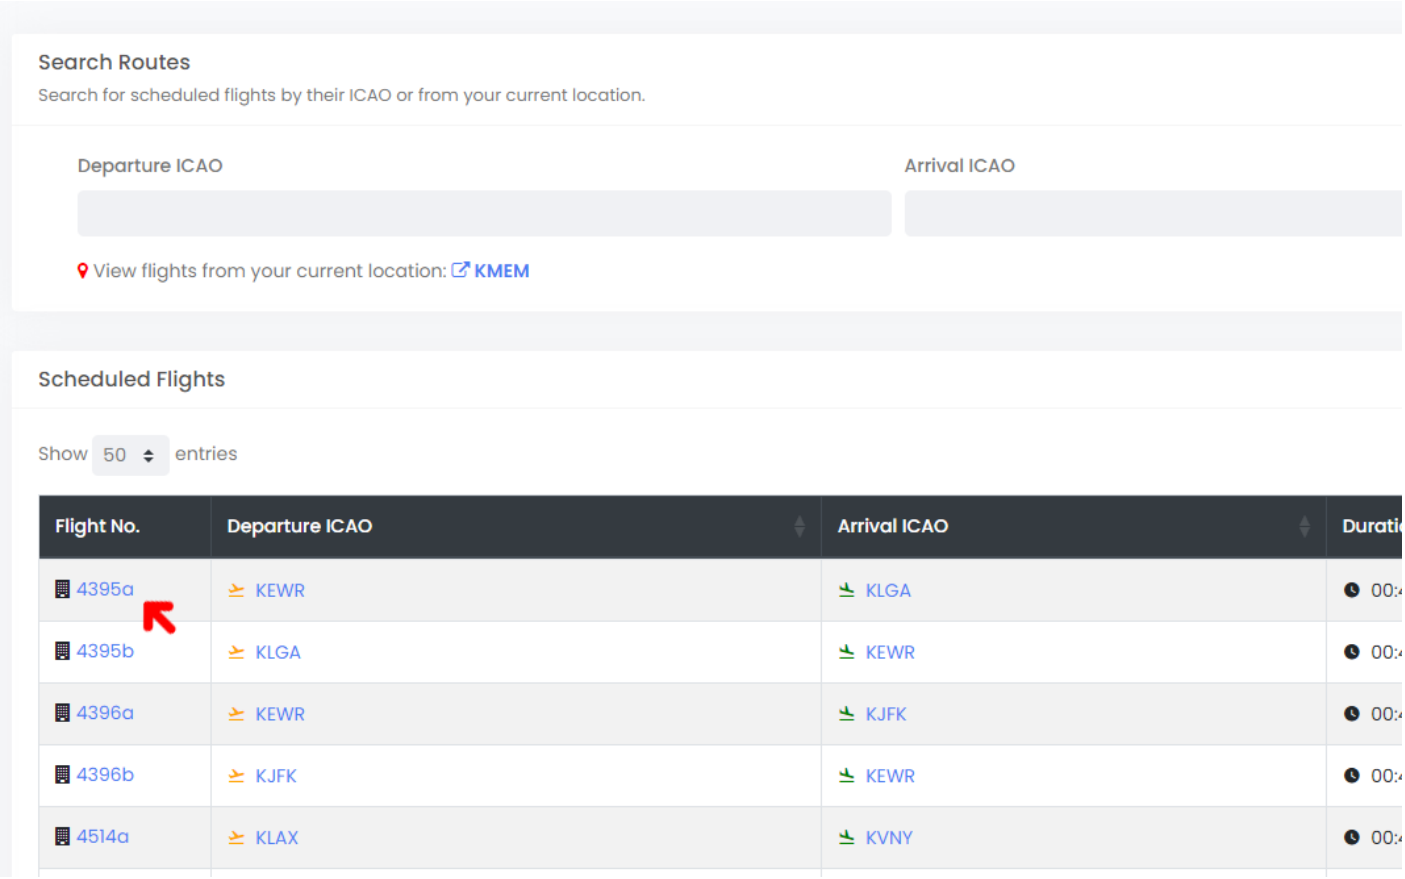

- Scheduled Flights
- Charter Flights

Scheduled Flights

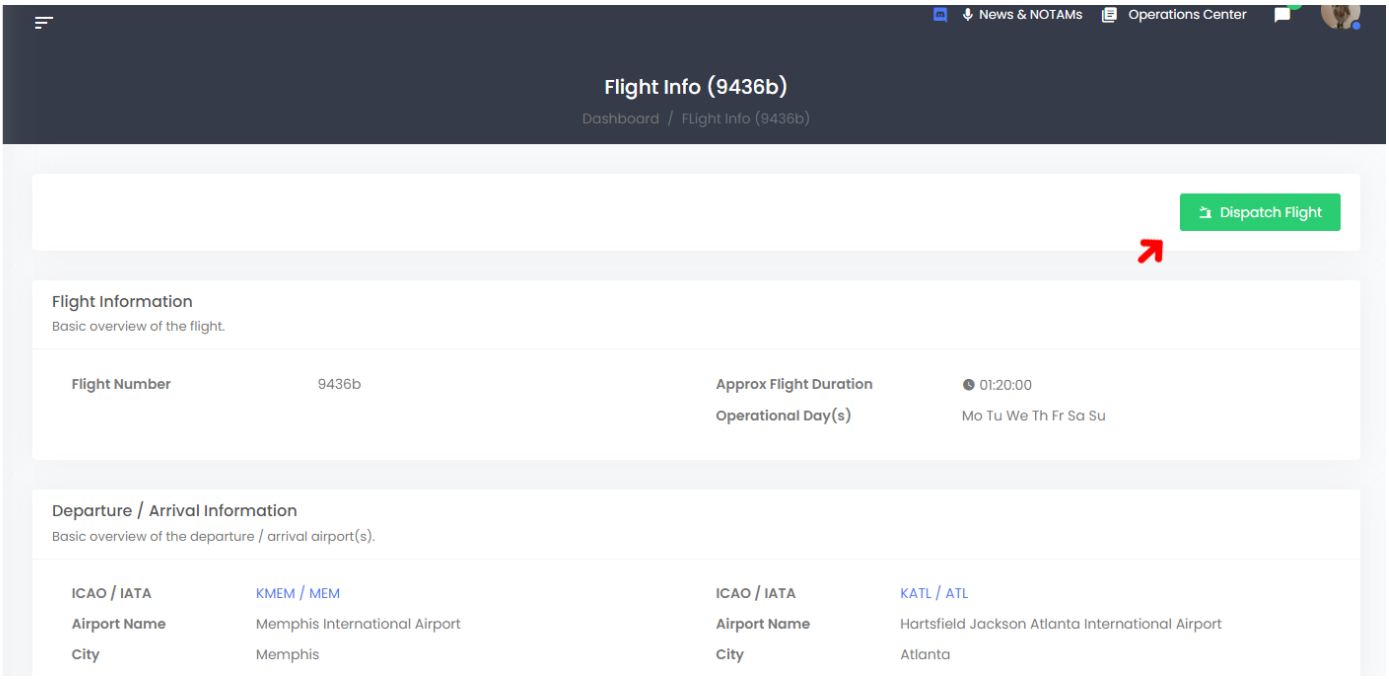

We have over **3000+** scheduled flights for our pilots to choose from, visit **Dispatch Center** and click on **Find Scheduled Flights**.

> **Note:** you can only depart from your current virtual location, you can click on your current **ICAO** location to show flights departing from it.

To select a flight you click on the **Flight No.** of the route you wish to take

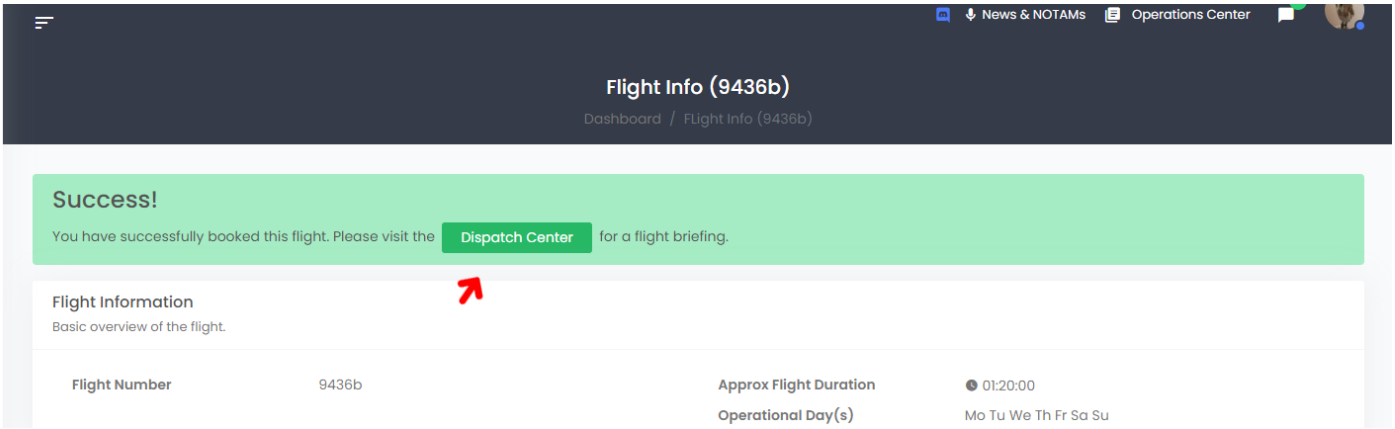

This will then load up the flight information, once you have determined that you wish to fly the route you have selected you can click on **Dispatch Flight**.

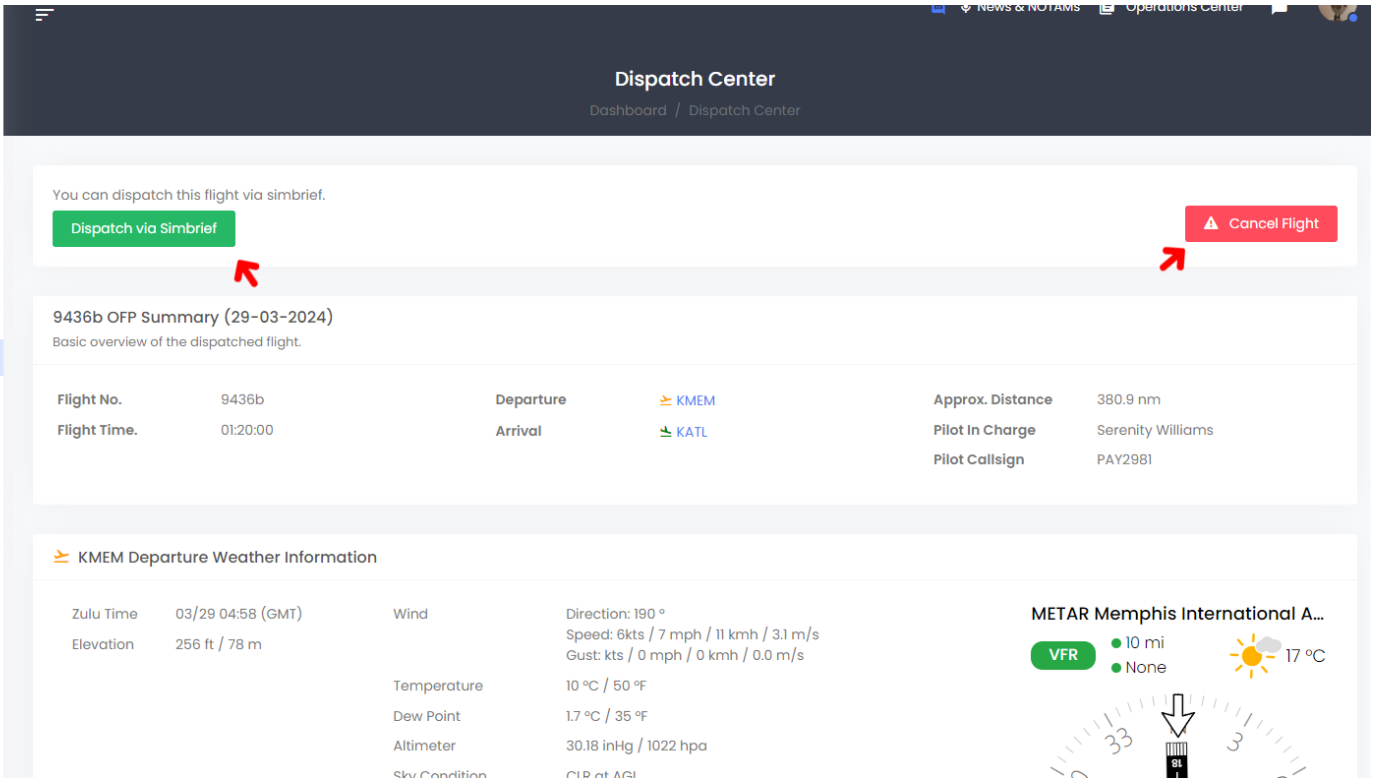

Once you click on **Dispatch Flight** button the flight will then be assigned to you.

You can now click on the **Dispatch Center** button or click on **Dispatch Center** on the left man navigation bar, an alert will also show up on the **Dashboard** indicating that you have an active flight.

You can now fly this route via our **ACARS** software, but you can also **Dispatch via Simbrief** this will allow you to create a full flight plan through SimBrief.

Just click on the **Dispatch via Simbrief** button and fill in the appropriate information required to create a full flight plan, you do not have to visit SimBrief as you can do it via our website, but that's entirely up to you.

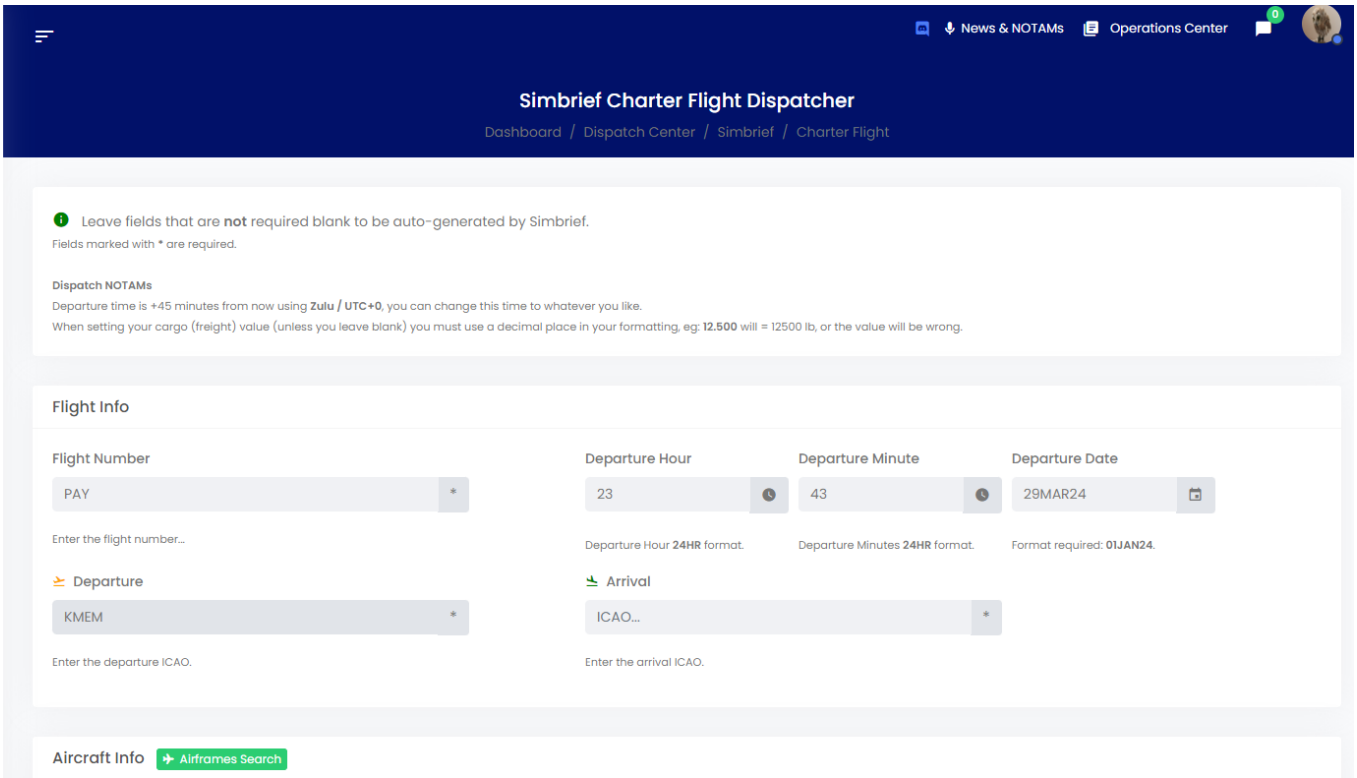

If you choose to no longer fly the route you can click on the **Cancel Flight** button and this will terminate the job.

> You will **not** be deducted any credits for cancelling a flight.

Charter Flights

Our pilots have the option to generate a C**harter** flight via our **Dispatch Center** and click on **Dispatch Charter Flight**.

> **Note:** you can only depart from your current virtual location, your departure location will automatically be added to the flight plan.

This system uses our **SimBiref** integration tool, which will submit a flight plan through simbrief and will give you the option to *pre-file* via vatsim.

You just fill the * required fields and any additional fields you wish to fill then click on **Dispatch Flight**.

This will then open a SimBrief pop-up window showing the flight plan being generated, once it has been generated, the website will then redirect you to the generated plan as shown below.
