

Charter Flights

Our pilots have the option to generate a **Charter** flight via our **Dispatch Center** and click on **Dispatch Charter Flight**.

Note: you can only depart from your current virtual location, your departure location will automatically be added to the flight plan.

The screenshot shows the 'Simbrief Charter Flight Dispatcher' interface. At the top, there's a dark blue header with navigation links: 'News & NOTAMs', 'Operations Center', and a user profile icon. Below the header, the title 'Simbrief Charter Flight Dispatcher' is centered, with a breadcrumb trail: 'Dashboard / Dispatch Center / Simbrief / Charter Flight'. A green information icon is followed by a note: 'Leave fields that are not required blank to be auto-generated by Simbrief. Fields marked with * are required.' Below this, there's a section for 'Dispatch NOTAMs' with instructions: 'Departure time is +45 minutes from now using Zulu / UTC+0, you can change this time to whatever you like. When setting your cargo (freight) value (unless you leave blank) you must use a decimal place in your formatting, eg: 12.500 will = 12500 lb, or the value will be wrong.' The main form area is titled 'Flight Info' and contains several input fields: 'Flight Number' (with 'PAY' entered and a '*' required field indicator), 'Departure Hour' (with '23' entered), 'Departure Minute' (with '43' entered), and 'Departure Date' (with '29MAR24' entered and a calendar icon). Below these are instructions: 'Enter the flight number...', 'Departure Hour 24HR format.', 'Departure Minutes 24HR format.', and 'Format required: 01JAN24.'. There are also 'Departure' and 'Arrival' sections, each with an 'ICAO...' input field and a '*' required field indicator. Below the 'Arrival' section is the instruction 'Enter the arrival ICAO.'. At the bottom left, there's an 'Aircraft Info' section with a green 'Airframes Search' button.

This system uses our **SimBiref** integration tool, which will submit a flight plan through simbrief and will give you the option to *pre-file* via vatsim.

You just fill the * required fields and any additional fields you wish to fill then click on **Dispatch Flight**.

This will then open a SimBrief pop-up window showing the flight plan being generated, once it has been generated, the website will then redirect you to the generated plan as shown below.
